

# *FlowBelow*®

## **Aerodynamic Technology for Tractors & Trailers**

Improve the fuel efficiency of your fleet with FlowBelow Wheel Covers and Drive Wheel Fairings.

***The Science is Sound. The Results are Proven.***

# Save 2.23%\*

with Tractor AeroKit™

## Fuel Efficiency Made Easy

Spec FlowBelow from any tractor OEM and talk with your trailer dealer to get wheel covers installed on new trailers. Visit [www.flowbelow.com/how-to-buy](http://www.flowbelow.com/how-to-buy) for more details.

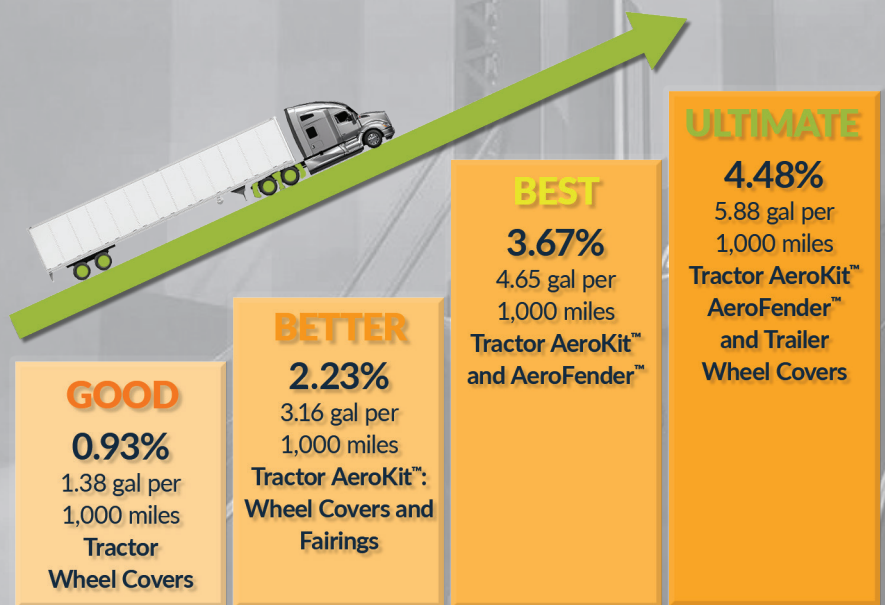

## Why FlowBelow?

FlowBelow products were designed using advanced computational fluid dynamics to optimize turbulent airflow around tractor and trailer wheels. Our team of engineers has designed an innovative and durable solution proven to save fleets thousands of dollars every year.

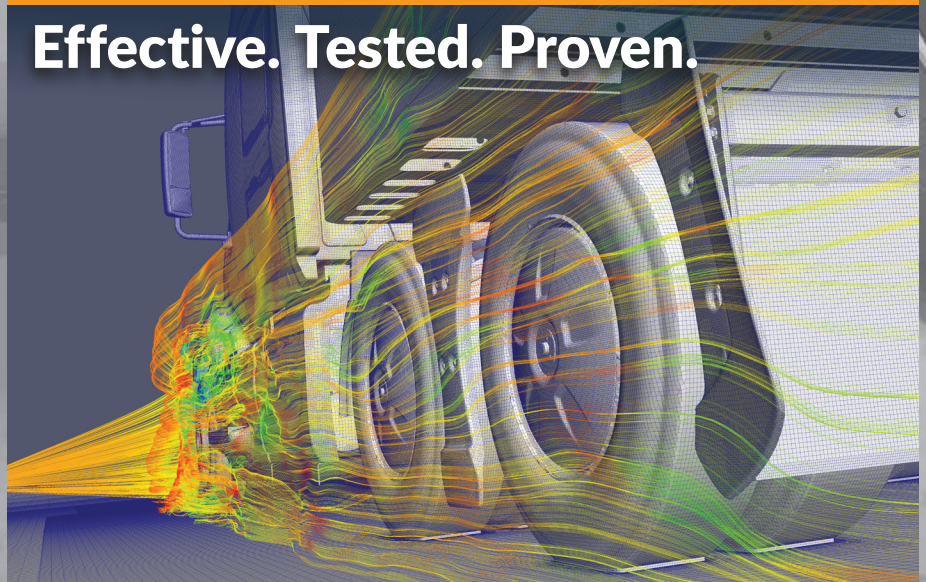

- **Save fuel**
- **Fast ROI**
- Easy to Install
- Minimal driver interaction
- Compatible with all TPMS, including Halo
- **Improve resale value**
- Advance fleet sustainability goals
- Extend range of electric vehicles
- **Reduce carbon footprint**
- Improve stability in high winds
- Reduce splash and spray
- Upgrade aesthetics
- **MVTS Certified Testing**
- **SAE J1321 Tested**
- Wind Tunnel Tested
- CFD Tested
- Real World Fleet Tested

## Fuel Savings

Save up to 5.88 gallons for every 1,000 miles\*

## Effective. Tested. Proven.

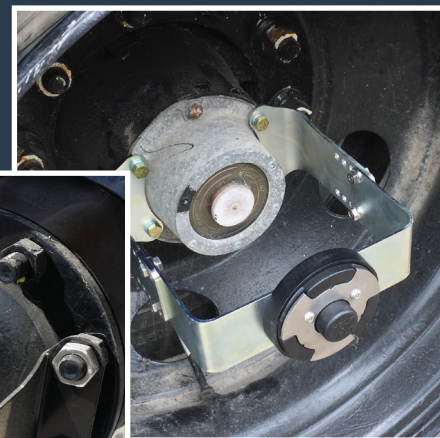

\*Fuel savings claim based on third party SAE J1321 fuel economy testing using EPA SmartWay guidelines, actual results may vary.

# Quick-Release Wheel Covers

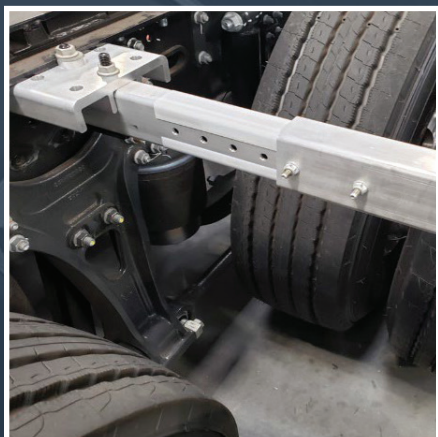

## For Tractors and Trailers

Drivers and mechanics require **immediate access to the wheels** for inspection and maintenance. In 2012, FlowBelow designed and patented the first and only aerodynamic wheel cover that fits securely to the wheel hub, does not damage the wheel, and allows the cover to be removed and reattached in seconds with a **simple push and turn motion**.

**Wheel Covers save 1.74%\* fuel when installed on tractor and trailer.**

- ✓ **INSTANT TOOL FREE ACCESS TO THE WHEEL END**
- ✓ **MECHANIC AND DRIVER APPROVED**
- ✓ **DURABLE CONSTRUCTION CAN LAST MULTIPLE TRADE CYCLES**
- ✓ **INDUSTRY STANDARD - OFFERED BY ALL OEMS**

## Tractor AeroKit™

The Tractor AeroKit™ is a unique aerodynamic system consisting of center and rear drive wheel fairings in combination with wheel covers. The Tractor AeroKit™ is installed directly to the 5th wheel rail and the frame rail of the truck in as little as one hour. Since the product was introduced all major truck OEMs now offer the product with factory installation.

**Talk to your dealer to spec and start saving today.**

- ✓ **HEAVY DUTY SPRING-LOADED MUDFLAP HANGERS INCLUDED**
- ✓ **EXTREMELY ROBUST DESIGN THAT EXCEEDS OEM STANDARDS**
- ✓ **OPTIONS FOR WIDE BASE, DUALS, LIFT AXLES & TAG AXLES**
- ✓ **COMPATIBLE WITH TIRE CHAINS, ICE, SNOW & EXTREME WEATHER**

# What Our Customers Say

“Given our experience with the product I would highly recommend making the FlowBelow Tractor AeroKit a standard spec for any regional or OTR operation. There is no better wheel cover or complete system on the market that can help improve the aerodynamics around the wheels of the tractor.”

**Royal Jones**  
CEO, Mesilla Valley Transport

“In addition to the proven aerodynamic benefits FlowBelow provides, their product is easy for our drivers. They can quickly maintain the equipment and check tire pressure, which also impacts fuel economy. The product has held up for us very well, and the support the team at FlowBelow provides allows us to have a great partnership. I would say the product has been tried and tested. You need to try it yourself and see how it would benefit your fleet.”

**Jeff Harris**  
VP of Maintenance, DB Schenker

## FlowBelow products save fuel for fleets across industry sectors:

- Dry Van
- Reefer
- LTL
- Liquid Bulk
- Dry Bulk
- Flatbed
- Tanker
- HHG
- Specialty Fleets

## FlowBelow's Mission

**500  
MILLION  
GALLONS  
SAVED  
BY 2030**
